EXPENSES

Please read the instructions below before filling out this section.

There are two types of daycare expenses – direct and indirect. Direct expenses are those that are 100% business related, meaning that your family did not benefit from the expense or use the item/items purchased. Examples of direct expenses are advertising, daycare licensing fees, toys that are used exclusively by daycare kids, etc. You can deduct 100% of these expenses.

Indirect expenses are those that are shared between your daycare & your family. Examples of indirect expenses are cleaning supplies, household supplies like light bulbs & toilet paper, children's toys or supplies that are also used by your own children, etc. You can only deduct a percentage of these expenses. I will calculate the percentage allowable so **please fill in the TOTAL amount below for ALL expenses**, taking care to put the expense amount under the correct heading (direct or indirect).

If you are listing an expense for which you have already calculated a business-use percentage, put the amount you calculated in the column for direct expenses. For example, if your cell phone bill was \$50 and you have already calculated that you used your cell phone for business 50% of the time, put \$25 in the column for direct expenses.

In the sections below, please list the total amount of your expenses for the year for each category. Examples of common daycare expenses are provided to help you. All expenses must have supporting documentation in order to be claimed. Examples of documentation are invoices, receipts, deposit slips, canceled checks, check registers, or bank and/or credit card statements. However, you do not need to provide me with the documentation.

FOOD EXPENSES

Please complete this section so that I can calculate your allowable food expenses for meals & snacks served to your daycare children. You may not claim food expenses for your own children, even if the food program allows you to claim them so the meal counts in this section should NOT include your own children.

Enter the total number of children served for each meal. Include your TOTAL count, even if some of them were not reimbursed by the food program. Do NOT include infants who are exclusively bottle-fed or breastfed unless you provided the formula.

Hint: You can use your sign-in/sign-out records for help in coming up with these totals.

If you would like to skip this table, please mark here to use your food program reimbursement total as your expense total (this will usually result in a lower deduction).

OPERATING HOURS

This section is used to calculate your time/space percentage, which is the percentage applied to business use of your home & other indirect expenses. You should use your sign-in/sign-out records to complete this section. Your operating hours are NOT the number of hours you're open; rather the number of hours you had children in care (from the first child's sign-in to the last child's sign-out. You can also claim the time you spent for your business outside of your operating hours but they must be hours you spent on your business at your home. For example, do not include time spent shopping for business supplies or going to classes. Do include the time you spent in your home cleaning up after the children, recordkeeping, networking with other providers (for example, email & internet groups), researching business issues (reading books, magazines, articles, etc. in print or on the internet), lesson-planning, meal planning, etc.

What are your normal operating hours?

_____ Total square footage of your home

_____ Total shared square footage used by your daycare (space shared by you/your family & your daycare)

_____ Total square footage used exclusively * by your daycare

* Exclusive use means that your family never uses this space, even when the daycare is closed *

How many weekdays were you closed in 2019? _____
